

CHAPTER: 5

DATA ANALYSIS AND INTERPRETATION AND DISCUSSION

5.1 Introduction

The present chapter focuses on data analysis and interpretation.

The researcher selected ten schools of which five were self financed and five were government aided. The researcher gathered data from 100 teachers i.e. 10 from each school. The overall description of the data collected, analysed and interpreted is depicted below.

5.2 Data Analysis and Interpretation

The table below presents the detailed data analysis of both the government aided schools and self financed schools.

Since the focus of the study was to get the data vis-à-vis the objectives and compare the status of job satisfaction of the self financed and government aided schools; the data obtained from the questionnaire were analysed using content analysis and percentage analysis and the same is presented in a tabular format below.
